From Training 3-1

8 January 1969

MEMORANDUM FOR THE RECORD

STAT   SUBJECT: [   ] - 6 January 1969

STAT   1. [   ] is a Support CT who opted *for* ~~from~~ Logistics last March. He
had been in Logistics since August 1967. He rotated four <u>months through</u>
Procurement Division and in December 1967 started in the [   ]   STAT
of Supply Division. In May 1968 he rotated to [   ]   STAT
Section where he has been serving as stock manager ever since. He was
STAT   nominated for a tour [   ] this summer. He has just told Logistics that
he wishes his name withdrawn and that he would like to work in the Logistics
Data Processing area for the next couple of years before accepting an overseas
assignment. Logistics' initial reaction is negative.

STAT   2. [   ] came over to see me 8 November for counseling. He felt
hemmed in his job because he could not exercise any initiative. Originally
he enjoyed being stock manager because of his excellent supervisor, Dave
STAT   [   ] was <u>pulled</u> out of Supply Division to work on the data
STAT   conversion activity and [   ] s next supervisor, although quite competent,
allowed no freedom of action. [   ] claims he is interested in the system
STAT   approach to Logistics' problems. He came over to see if there were any par-
ticular openings in SIPS where he could work on Logistics' problems or if
there were any opportunities that would permit him to flex his data processing
muscles. He has taken <u>three</u> ADP courses at American University. He also
STAT   said that the proposed [   ] assignment was an excellent opportunity for him
and he could not think of a better first tour.

STAT   3. I discussed [   ] case with [   ] and we agreed that   STAT
STAT   it would be best for [   ] to stick it out. He would be going into training
for his overseas assignment in early spring. Assuming that he had a
STAT   successful tour [   ] would be in a much better position to
influence his later assignments in Logistics. I passed this on to [   ]
on 13 November.   STAT

- 2 -

4. Apparently after much soul searching, [_____] laid his cards on the table with Logistics. He would like very much to work now with [_____] who are concerned with Logistics Data Processing and defer o/s for two or three years. He wants to become a Logistics manager. He feels it is important to be in on the beginning of ADP in LOG. Logistics is somewhat shocked by [_____] withdrawing his name for [____] (understandably because this is a prum assignment) and is not encouraging [_____]s career aspirations. I have talked with [_____] and will see [_____] to urge experimenting with [_____]. If Logistics can't fit this man into a career development plan, he will probably leave. [_____] plans to look around for alternatives on the outside. He will check this out with [_____]
